

VENTE OCCASION

TRIMARINE OBI ONE

695 000 € TTC

DESCRIPTION

The Trimarine Obi One is a beautiful, ocean-going, fast-cruising 57' catamaran built for an experienced Italian owner. The renowned French naval architects Lerouge Yacht Design are responsible for her sleek exterior lines, while the rotating wing mast is a work of Lorima, the most reputed company for the construction of masts for multihulls. Her hull is in epoxy composite, her superstructure in fiberglass carbon-reinforced.

The sophisticated yet plain interior and the furniture are works of Alessandro Vismara , who paid particular attention to weight saving as a significant performance factor in this kind of vessels. Also the choice of leaving interior surfaces visible has been inspired by the same principle.

Trimarine shipyard, that successfully completed more than 200 projects worldwide, including the construction of the 'Il Moro di Venezia' and of many other vessels racing in the America's Cup and VOR 70, was in charge of Obi One's project, choosing the best suppliers and technical equipment.

Obi One features 4 guest cabins and 1 crew cabin. She has been built with quality and accuracy in mind both in the construction process and in the choice of navigation tools. Obi One is RINA certified.
